September 10, 2009

**Vantage® Announces Executive Promotion & Extends
Specialty Pharmacy Availability to 24/7 to Accommodate Demands**

Vantage® Home Infusion and Specialty Pharmacy is certified by The Joint Commission and has a multidisciplinary team of clinical pharmacists, Certified Registered Nurse Intravenous (CRNI), Certified Pharmacy Technicians (CPhT) and reimbursement specialists. Vantage® not only meets but exceeds certification requirements set forth by The U.S. Pharmacopeia (USP). USP is the governing body that sets the practice standards to help ensure high quality in clean rooms where compounding of sterile preparations takes place.

Vantage® proudly announces the appointment of Julianne Sommers, R.Ph as Vice President of Infusion Services. “Julie has been a tireless force in establishing Vantage’s specialty pharmacy and bleeding disorder’s program. Her industry experience and management abilities make her the ideal choice to drive growth in both our core infusion and specialty services.” stated MaryJo Hunter, PharmD, COO.

The Vantage® relocation to the Talon building provides staff as well as patients with the best amenities the industry offers for Infusion Services. Infusion and specialty pharmacy specifically, has a state of the art, 525 square foot, modular clean room. “We are all very excited about the move to the new Vantage Center. It is amazing to see how much Vantage has grown since I started with the company nine years ago.” Stated Sommers, R.Ph, VP of Infusion Services.

“In an industry where turnover is common place, we understand the value our people bring to Vantage® as well as the region. The extensive experience of our team enables us to effectively communicate and respond to any changes in the patient's status related to their therapy. We have a great team.” Stated Julianne Sommers, R.Ph, VP of Infusion Services.

Home Infusion Therapy enables patients to receive care conveniently in the comfort of their own homes. The benefit of being home allows patients to take a more active role in their own healthcare. Home infusion therapy is not only more cost-effective than inpatient treatments, but studies show it eases the stress and anxiety of treatment. This directly results in better patient outcomes.

Vantage Home Infusion Therapy Services proudly serves: Western and Central PA, Northwest NY and Northeast OH

Vantage Healthcare Network, Inc.®
