

Our Commitment to you . . .

The Most Cost-Effective Negative Pressure Wound Therapy System Available

Negative Pressure Wound Therapy

An important clinical difference for your residents

Lower negative pressures create a gentler patient experience:

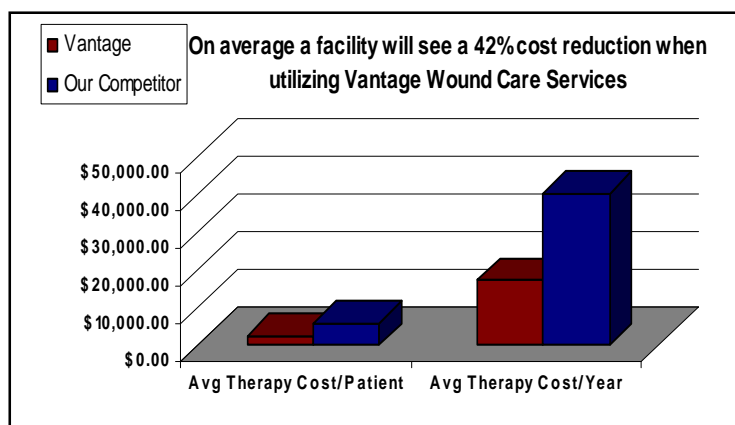

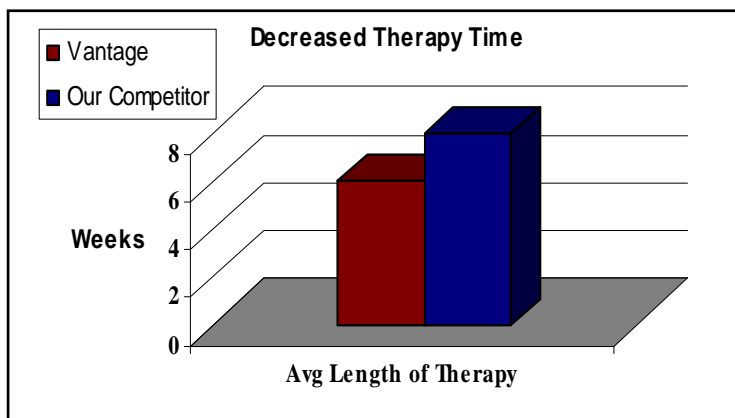

- ✓ Less pain during therapy
- ✓ Less risk of periwound damage

The Chariker-Jeter wound dressing technique adds comfort with:

- ✓ Fewer dressing changes
- ✓ Decreased pain upon dressing removal due to non-adherent dressing that minimizes growth of granulation tissue into the wound contact layer

A gentler patient experience may improve clinical and economic outcomes:

- ✓ Improved patient compliance
- ✓ Reduced need for pain medications
- ✓ Fewer overall dressing changes
- ✓ Time- and cost-efficient wound management

Indirect Savings . . .

- *Less frequent dressing changes*
- *A decrease in nursing time*
- *Vantage® clinical and service support*
- *Vantage® is locally owned and operated*
- *Consultative wound management*

Call Vantage® today for additional information. See how we can reduce your wound care costs while improving the lives of your residents.
