*The Vantage® Difference
“Sets Us Apart”*

- ✓ *Comprehensive Patient Focus*
- ✓ *Expert Staff*
- ✓ *Technical Excellence*
- ✓ *Exceeding Needs and Expectations*
- ✓ *Continuum of Education*

GreenLight HPS™

High Speed Performance with Precision

Delivers consistent and sustainable vaporization over a large range of working distances, anatomy configurations and tissue composition. Allows for shorter procedure time and more efficient treatment of large glands.

Intelligent Design

A wide range of power settings allow the surgeon to match the nuance of each surgical situation, from anatomy configuration to tissue composition, with TURP-like control over Vaporization/Coagulation and Ready/Standby modes.

Air Cooled System

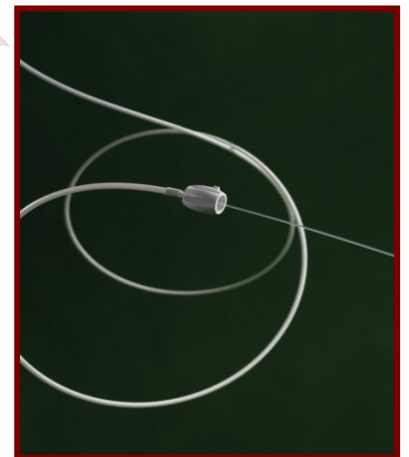

Eliminates the need for external water connections.

Solid-State-of-the-Art Modular Construction

Reliable cutting edge technology sets a new industry standard for high performance with easy care maintenance features.

Precision Beam

A low divergence precision beam allows rapid vaporization over a large range of working distances. Unique design eliminates backscatter to protect vital tissue structures.

Vantage® Mobile Services

Providing Quality MRI, Lithotripsy, PET/CT, and other
Diagnostic Mobile Services for Facilities and Organizations
