

PET/CT - Positron Emission Tomography/Computed Tomography

Vantage® has assembled a PET/CT services team capable of understanding the changing nature of healthcare and able to adapt to an ever changing market. Vantage® believes that this focus on quality and customer satisfaction separates us from other service providers.

Our all inclusive “turn-key” service includes:

- Screening & Scheduling
- Comprehensive Staffing Model
- Over-read Service
- Radiologist Education
- Education & Marketing
- No Minimums
- Radiopharmaceutical
- No Charge for Cancelled Patients
- Image Viewing Workstation
- Vantage® Held RAM Licensure
- All Medical Supplies

Lithotripsy - Extracorporeal Shockwave Lithotripsy

Vantage® Mobile Lithotripsy provides equipment choice by offering both the Storz Modulith SLX-F2 Lithotriptor and the HealthTronics Lithotron. Vantage® provides turn-key services including experienced technicians, no charge for cancelled patients, consultation/education, site planning and low re-treatment rates.

GreenLight Laser Services

GreenLight™ Laser Therapy is a minimally invasive treatment option that combines the effectiveness of the traditional surgical procedure known as transurethral resection of the prostate (TURP) with fewer side effects. The GreenLight laser system delivers the ultimate BPH solution - free from urinary symptoms, and free from compromise. This procedure provides rapid urine flow improvement, a quicker return to normal activities, and is virtually bloodless.

Vantage® uses the GreenLight HPS™ to perform these procedures at local and regional hospitals through contract service agreements. Vantage supplies a staffed GreenLight Certified Technologist for all procedures, routine scheduled service days, collaborative development and implementation of an educational strategy specific to your medical staff and community.

MRI - Magnetic Resonance Imaging

Vantage® uses the latest GE Short-Bore MRI, 1.5 T Excite II Echospeed, to provide doctors with more than twice the detail and resolution compared to current Open MRI scans. Radiologists agree that detail matters when it comes to making accurate MRI readings and decisions regarding your well being. The Vantage® route services facilities in the United States along with *interim MRI units that serve hospitals nationally.

(CT) Computed Tomography

Vantage® Mobile Services can provide a GE LightSpeed 16 VFX Mobile CT Scanner for route or rental services. Vantage® Mobile Services provides a turn-key service that includes; patient screening, scheduling, insurance authorization and staffing by our experienced, dedicated CT Technologists.
